Journal of Fluid Mechanics **Volume 352 10 December 1997**

J. Olejniczak, M. J. Wright & G. V. Candler Numerical study of inviscid shock interactions on double-wedge geometries *page* 1

B. A. Haven & M. Kurosaka Kidney and anti-kidney vortices in crossflow jets 27

R. D. Henderson Nonlinear dynamics and pattern formation in turbulent wake transition 65

I. B. Bazhlekov & P. J. Shopov Numerical simulation of dynamic contact-line problems 113

C.-H. Ho & Y. Zohar The PVC technique–a method to estimate the dissipation length scale in turbulent flows 135

C. F. Chen & F. Chen Salt-finger convection generated by lateral heating of a solute gradient 161

J. F. Padday, G. Pétré, C. G. Rusu, J. Gamero & G. Wozniak The shape, stability and breakage of pendant liquid bridges 177

C. Davies & P. W. Carpenter Instabilities in a plane channel flow between compliant walls 205

F. J. Beron-Vera & P. Ripa Free boundary effects on baroclinic instability 245

A. M. H. Brooker, J. C. Patterson & S. W. Armfield Non-parallel linear stability analysis of the vertical boundary layer in a differentially heated cavity 265

J. W. M. Bush The anomalous wake accompanying bubbles rising in a thin gap: a mechanically forced Marangoni flow 283

W. Boos & A. Thess Thermocapillary flow in a Hele-Shaw cell 305

R. Smith Multi-mode models of flow and of solute dispersion in shallow water. Part 3. Horizontal dispersion tensor for velocity 331

L. Wang Frame-indifferent and positive-definite Reynolds stress–strain relation 341

K. Trulsen & K. B. Dysthe Frequency downshift in three-dimensional wave trains in a deep basin 359

BOOK REVIEWS

The Ocean Circulation Inverse Problem, by C. Wunsch 374

Gravity Currents in the Environment and the Laboratory, by J. E. Simpson 376

INDEX TO VOLUME 352 379
